SINCERE THANKS TO
ARCHITECTS
CIVIL ENGINEERS
CLIENTS
STAINLESS STEEL HANDRAILS
& GATE MANUFACTURERS
AND MY STAFF
- AR.SENTHILKUMAR.

We, at **Gs Metal Craft, & Sri Mohan Industries Trichy**, manufacture Stainless Steel Compound Gates, Handrails, Structural Staircases, Balustrades and more. Our factory is in Woraiyur, Trichy.

We undertake Projects all around Tamilnadu, Kerala, Andhra Pradesh and Karnataka.

Our company follows well-planned strategies to execute the design as per client's requirement. we are proud in showcasing unique designs with best workmanship giving personalized satisfactory experience to all our Clients & Customers.

We serve as per architects advise, engineers specification & clients expectation.

We have exclusive showrooms at **TIRUPUR & NAGERKOIL** too.

Services:

- . automated compound gates
- . safety gates
- . handrails
- . balcony railings
- . structural staircase
- . balustrades
- . stainless steel tubes
- . HPL Sheets and much more...

Gs Metal Craft, Kuzhumani Road, Woraiyur. Trichy-3. M - +91 98651 94799.

Stainless Steel Handrails

Stainless steel is highly durable and its a versatile metal widely used in civil industries for Compound Gates, Handrails, Lobby, Structural Staircases and etc. because it is a sturdy material and easy to maintain.

benefits of using stainless steel handrails in residential and commercial buildings,

- . highly durable material
- . easy to maintain
- . Non rust 304 Grade material
- . easy to match with any decor
- . aesthetically appealing
- . stainless steel railings are available in a variety of designs
- . great for outdoor and indoor in any type of buildings
- . works for your budget

Sipcot Fitting Slotted Square Tube

Handrails with
Stainless steel in matt finish slotted
square tube, sipcot fitting and clear
toughened glass gives contemporary
look to your interior & exterior needs.

Spiral Staircase

Spiral staircases are a type of round stair or curved stairs that consists of individual steps, or treads, that are connected to a center column.

In this Spiral Staircase, center pole, stringers & steps are designed like wood which makes Stainless Steel handrail with simple fittings looks beautiful and turns the focal point of the living room.

Site: Srirangam,
Trichy.

Gs 20 - Hockey Fitting

Helical Staircase

Stainless Steel Handrail with Hockey fitting and 12mm toughened glass adds elegant look to helical staircase.

Highlight: Here, We have used minimal size of glass in the curved area to avoid bend glass.

Site: Trichy.

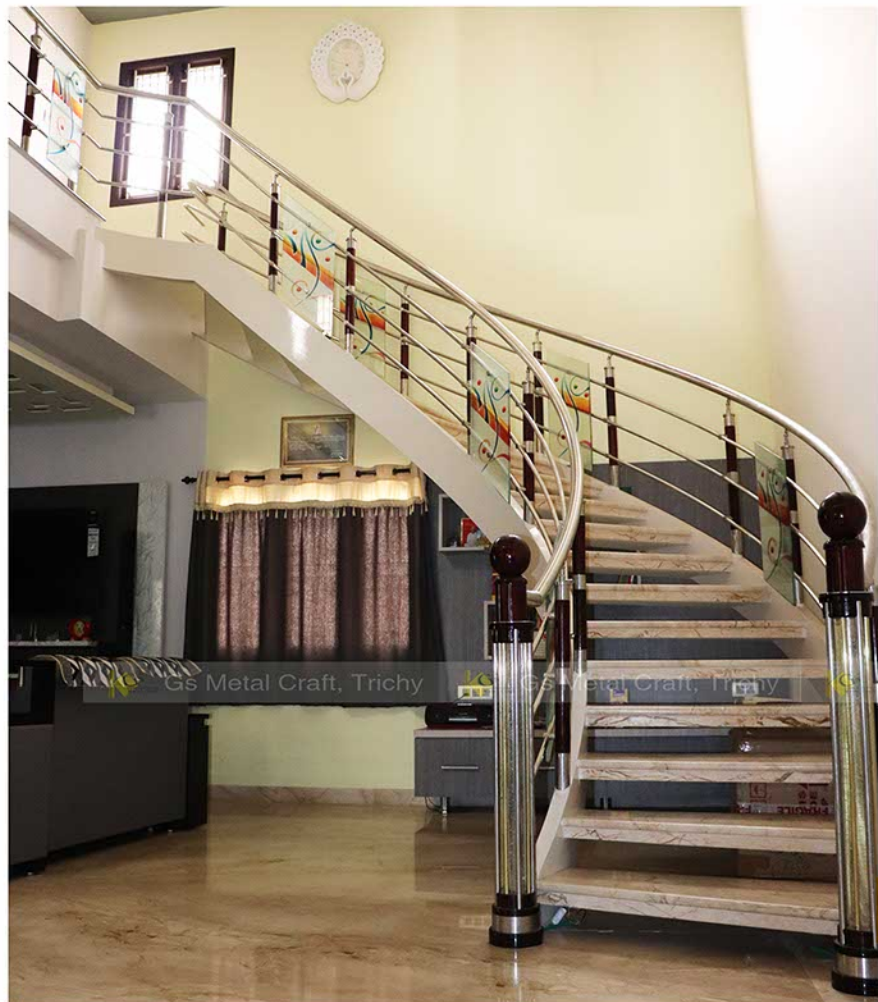

*MS Structural Staircase
Stainless Steel handrails
Gs - wooden Balustrade*

In this project, Our Client was very keen about the MS Structural staircase's Handrail combination with Stainless steel, glass and wood. So, we decided to make the unique master balustrade using glass pillar with lighting. To add more colour, we have used Gs WB 020 Balustrade and Designer Glass in the middle with 3 liner to get a classical look. We were happy, when we got appreciation for this.

Now, it is one of our fast moving product in trading side also.

Gs WB 038

This Project is done in Sivakasi recently. Client's requirement is wooden railings and balustrade with carving work.

As per client's need,

These Balustrade is made with the help of CNC router work, Laser cutting job and more. We can also adjust the height of the balustrade and can be done in all wooden shades.

Site: Sivakasi

Gs Master B' 013

Master Balustrade holds & supports the handrails. Also it gives an elegant look to the staircase.

In this Balustrade, We can also use Titanium Material instead of stainless steel sheet.

BALCONY RAILINGS

In this Balcony Railing, We have used 3mm thick SS laser cutting plate with titanium sheet and 12 mm toughened clear glass. We thought to avoid, usual glass fittings which are available in the market to connect these Laser cutting plate and glass.

So we have specially designed this stainless steel balustrade in which you can't find usual fittings.

Site: Mannargudi.

This Balcony Design is fast moving and suitable for contemporary model buildings.

Foldble
Sliding Gate
for
No Space around
and
Short Road Width

In this site, there was no space to slide the gate. So, We decided to divide the gate into 6 leafs (usually sliding gate will be in a single frame.) to turn the gate smoothly using track systems. Ask our representative for video.

Next, In design side we introduced projections for laser cutting plates to match latest trends.

Sea Breeze Hurts Stainless Steel Gates

In coastal areas, the chloride in sea spray, rain and dry salt particles that the wind carries can contribute to the corrosion of stainless steel. Areas within 10 miles of salt water are generally considered at risk of salt-related corrosion, but that distance varies with location and weather patterns.

How can we prevent

In a perfect world, stainless steel would not corrode at all. But, when the environment overwhelms the metal's passive layer with something like salt, it begins to break down. Stainless steel corrodes in two main forms. Pitting appears in the form of dark brown pits in the steel's surface. You might also see a form of corrosion that creates a large crevice in the steel's surface. Neither of these forms of corrosion affects stainless steel's mechanical properties, but they are unattractive.

A high-grade stainless steel is the best way to help corrosion from the sea breeze.

Compound Gate in Stainless steel 316 Grade for coastal areas

Chemical Composition of Stainless Steel

	304 Grade	316 Grade
Carbon	0.08 % max.	0.08 % max.
Manganese	2.00 % max.	2.00 % max.
Phosphorus	0.045 % max.	0.045 % max.
Sulfur	0.030 % max.	0.030 % max.
Silicon	1.00 % max.	1.00 % max.
Chromium	18.00 - 20.00	16.00 - 18.00
Nickel	8.00 - 10.50 %	10.00 - 14 %
molybdenum	-	2.00-3.00%

Ramnad.

Mild Steel Compound Gates

Usually, We don't recommend MS Gate for our clients because it needs high maintenance. we use heavy gauge of Mild steel sections which will cost more or less equal to stainless steel gate.

But,

we do MS Gate if it is asked by the client particularly.

Adding
HPL sheet
in sunshade drop
gives
contemporary
look to building.

Gs BATHROOM CUBICALS & LOCKER SYSTEMS

Modular cubicals are one of the most cost-efficient and modern concepts in restroom designing.

Economy of space

The Partition panels are only 12mm or 18mm thick as compared to 150mm thick brick wall.

Minimal installation time - 4 Cubicals can be setup in a day

Neatness - Since no wet work involved. Proper air ventilation access is provided in the designs.

Easy Floor Cleaning - Absence of corners doesn't let the dust to accumulate on the floor.

Vibrant Range - Available in different colours and patterns.

Site: Contonment, Trichy.

RESTROOM DIVIDER PANELS

These Restroom Divider Panels (Urinal Partitions) come in vibrant colours & design and are made with colour superior grade 12mm compact laminates that come with the seal of anti-bacterial and anti-fungal protection.

The material and colour can be perfectly attuned to the layout of the room and cubicals.
